

Voting Record of the 68th North Dakota Legislative Session – 2023

If you are one of those voters who wonders where the money goes..... If you despair of the ever-increasing control of government over every aspect of your life..... This voting index is for you!

Most voting indexes only reflect the special interest of groups wanting more money or power. This index represents no such special interests. We believe with Thomas Jefferson: "That government is best which governs least." We ask of our legislators only such laws as are necessary to preserve the order of a decent, civilized society, with a maximum of personal responsibility and freedom, and a minimum of taxation and compulsion.

On this basis, we evaluate votes on various **bills which would either increase or decrease the size, cost, scope and power of government**. Every vote for an INCREASE in government rates ZERO, and the closer the Representative's score is to ZERO, the more it represents the philosophy of **Socialism**. Every vote for a DECREASE in government and for more personal responsibility and individual liberty rates a PLUS, and the closer the Representative's score is to 100%, the more it represents the philosophy of **Americanism**.
